

## Key Features

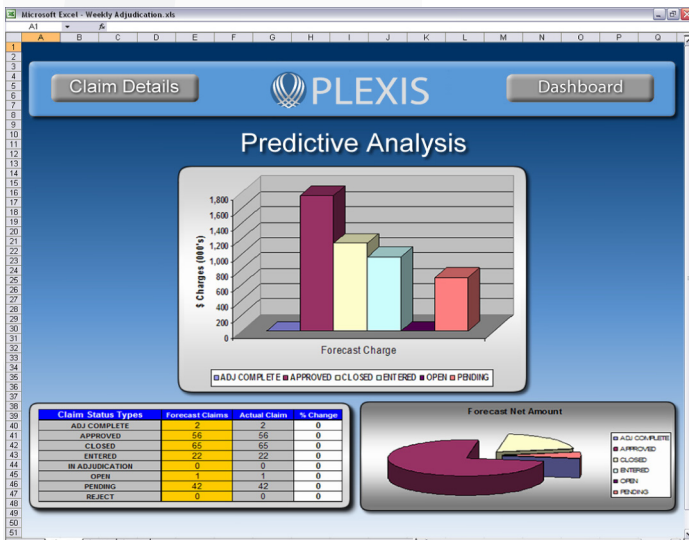

- Multi-dimensional, business intelligence cube-based Reporting
- Excel and Web Interfaces: Perform analysis, view reports, and update data using either Excel or Web user interfaces
- A highly automated planning process with a pre-built financial databases

## All-in-one Planning, Budgeting, Forecasting & Reporting

### Industry-leading Analytics and Reporting Capabilities

Plexis Analytics features a customizable reporting “dashboard” that allows users to perform claims analysis, predictive analysis, and review details of claims by status, and can include any other Plexis Claim Manager data. Plexis Analytics is integrated with Microsoft Excel to provide an Excel front end with true analytic capabilities and the power of real-time on-line analytical processing (OLAP)

features.

### Strategic Planning

A multi-dimensional analytics platform enables decision makers to develop budgeting and forecasting strategic plans across your enterprise. Plexis Analytics allows you to monitor performance against the key indicators of your financial and operational plans, interpret past results and take the appropriate actions to improve business performance.

### Flexible, Accurate Budgeting

Working seamlessly with Excel, Plexis Analytics extends Excel’s flexible real-time “what-if?” modeling functionality, vastly expands its scalability. In addition, it offers a highly automated budgeting process with a pre-built financial database.

### Forecasting

Plexis Analytics integrates historical information and forecasting plans into a single budgeting, reporting and analysis application. You pull all data into one location to pose all your possible scenarios and see the results immediately and then publish as a report for review. If you’re producing rolling forecasts you can include all the variances of your business, including any time frame.

### Real-time Reporting

Real-time reporting for healthcare entities means that decision-makers across the enterprise – including senior executives, planners, and operations managers – can simultaneously read and revise information as the need arises. Plexis Analytics, with its high performance capabilities for complex business models, provides users with opportunities to improve their operational effectiveness.

### Real-time Business Modeling

Business modeling creates the opportunity to evaluate a variety of scenarios rapidly, allowing more time for analysis. Plexis Analytics real-time modeling capabilities allow you to handle complex business models such as risk analysis, activity-based costing, inventory and merchandise planning, supply & demand, customer/product/brand profitability and compensation planning. Creating models can be as simple as entering numbers, changing them, and immediately see the impact of those changes.

### Fast Implementation, Rapid ROI

Plexis Analytics’ single platform allows organizations to implement the application in a fraction of the time required by other BPM suites that consist of several products with different architectures and interfaces. Plexis Analytics integrates seamlessly with Plexis Claims Manager, so organizations typically require less IT involvement, training and maintenance than other solutions.

- Workflow, including alerting, to manage the process and keep plans current
- Standard templates for planning reports
- Versioning so that as your planners, financial analysts and line-of-business managers prepare plans, your organization can work with several versions of a plan
- On-line Analytical Processing (OLAP) allows analysts, managers and executives to view data across multiple dimensions and drill down into specific data.

**Plexis Healthcare Systems** is one of the fastest growing claims processing software developers in the healthcare market-place, and has provided cost-saving solutions for healthcare organizations since 1996.

A Certified Microsoft Partner, Plexis is also a selected partner in Microsoft’s Connected Health and Human Services (HHS) alliance.

Plexis software and services enable healthcare organizations to increase profitability and enhance customer satisfaction while helping them meet all current governmental regulations, including HIPAA.
