

Plexis EDIWorks Highlights

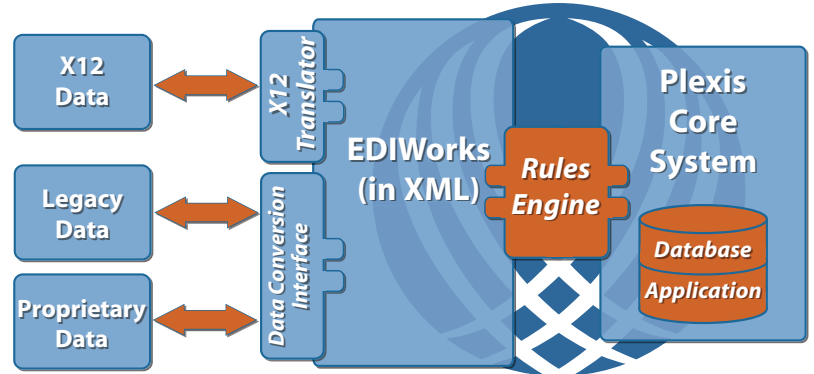

Reduce Administrative Costs with EDIWorks

- Supports many X12 formats
- Import, Auto Adjudicate & export functionalities (Automated PPO Repricing)
- Customizable to client's specific needs
- Supports default values
- SQL queries, in equation and out equation functionalities
- Configurable mapping & business logic rules
- Conversion & insertion of X12 or flat file data into PCM database
- Gateway for X12, legacy & inter-company data
- Converts X12 data to XML

Configurable Rules Eliminate Manual Data Entry

EDIWorks is a powerful electronic gateway that combines EDI, an XML-based translator, and data conversion interface with a powerful rules engine that conforms to your organization's processes. These components work together to send and receive X12 and other data formats to and from Plexis Claims Manager for smooth electronic transmission.

Data can come from a variety of sources, making this a versatile gateway not only for X12, but also for legacy, inter- and intra-company proprietary data.

EDI Interface Supports Many Major X12 Formats

EDIWorks has been certified by Claredi to meet Claredi's X12 standards. EDIWorks supports major X12 formats and automatically integrates X12 data into Plexis Claims Manager.

Sophisticated Rules Engine

Configurable EDI eliminates manual data entry, and EDIWorks includes a rules engine that allows our knowledgeable Plexis EDI staff to map, scrub, translate and validate data and set specific business rules to your organization's unique needs. By maintaining proprietary business rules, verifying the integrity of imported data and providing crosswalk functionality, EDIWorks saves time and reduces administrative costs associated with paper-based claims processing.

Customizable EDI Rules and Data Conversion Interface

Plexis EDIWorks features customizable benefit administration and claim processing rules. EDIWorks also includes a data conversion interface that automatically applies formats and rules to imported and exported data to further improve productivity.

About Plexis Healthcare Systems, Inc.

One of the fastest growing claims processing software developers in the healthcare marketplace, Plexis has provided cost-saving solutions for healthcare organizations since 1996. Plexis is a designated small business and minority owned business, headquartered in Ashland, Oregon. Plexis serves healthcare payer organizations across the United States as well as international clients.

A Certified Microsoft Partner, Plexis Healthcare Systems' benefit administration tools employ the very latest Microsoft technology and are highly rated by independent healthcare consultants. The company is also a selected partner in Microsoft's Connected Health and Human Services (HHS) alliance.

Plexis software and services enable healthcare organizations to reduce costs, streamline and automate their claims payment and medical case management requirements, increase profitability and enhance customer satisfaction while helping them meet all current governmental regulations, including HIPAA.
