

Gain More Productivity:

- Easy export of R&E data sets directly to IHS facilitates faster funding
- Fully integrated database eliminates redundancies and reduces data maintenance
- EDI capability saves time and reduces staff expense
- Training optimizes staff's knowledge and efficiency by using exercises based on your business requirements

"We're seeing a reduction in average claim payment turnaround time of up to 40%"

– Community Resource Program Director, Alaska.

"In my 23 years in claims adjudication, I have never worked on a claim system where the plan setup is as easy, efficient and as straightforward as Plexis LCS."

– Claims Specialist, Washington D.C.

LCS-IHS0110-v1

Flexible Automation Enables You to Process More Claims in Less Time with Greater Ease and Accuracy

Plexis LCS provides Native-run health organizations, Contract Health Care Programs (CHCP) and third party administrators with a complete claim processing and benefits administration package that is easy-to-use, affordable, and flexible to grow with your business.

Claim Processing

Single screen entry with hot keys to allow operators easy access to detailed member information such as claim history, benefit accumulators and notes. Efficiency features including automated fee schedule repricing and easy export of registration and encounter data in flexible IHS-compliant text format save time and boost productivity.

Registration/Enrollment

An integrated file system simplifies single entry processing, maintenance of registration information and captures greater detail within contract health standard data sets.

Electronic Data Interchange (EDI)

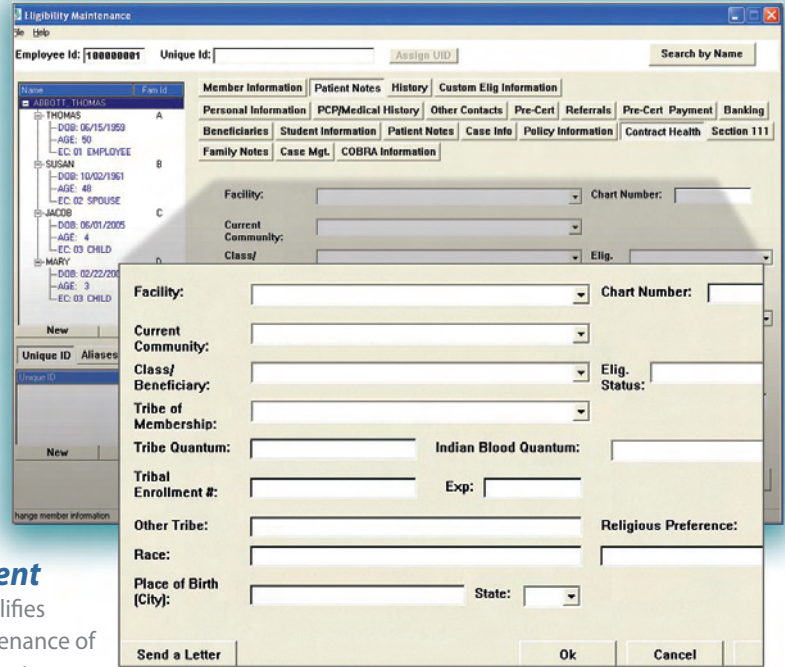

Electronic claims can be received from any source and easily downloaded into the system. Electronic transmissions can be viewed by the operator as a simulated claim form (HCFA1500 and UB04) to aid in claim review. All electronic claim information is stored for future retrieval and audit purposes.

Automated Letters

Correspondence, such as custom denial letters, and system data can automatically be inserted into Microsoft Word documents. The system also supports automatic tracking and posting to patient files.

Custom Notes

There are an unlimited number of free-form notes available for members, providers and claims. Also, members have additional note screens to record personal information, other contact information, claim referrals and pre-authorizations.

Claims processing easily captures more registration and encounter data in IHS standard data sets for better reports management.

Advanced Security

System security can be set at the operator level. Security levels can be set to deny access to an area of the system or allow access to certain functions within an area.

Flexible Reporting

In addition to over 50 standard paid claims analysis reports, the system also includes:

- Vendor Payments
- Reporting by Denial Codes
- Top Procedures, Diagnoses, Vendors, etc.
- Claims By Age
- CHEF reporting

Microsoft Windows Technology

Plexis LCS software is built with Microsoft Windows technology to seamlessly integrate into your current office. Its familiar Windows interface makes it easy for your staff to use the system.

Plexis Healthcare Systems software and services enable healthcare organizations to increase profitability and enhance customer satisfaction while helping them meet all current governmental regulations, including HIPAA. A Certified Microsoft Partner, Plexis is also a selected partner in Microsoft's Connected Health and Human Services (HHS) alliance.
