

- **Plexis WEBWorks: All-in-one web portal provides instant web-based claim processing, CDHC support and advanced reporting features**

- **Time proven technology: LCS has provided flexible automation for healthcare administrators since 1988.**

- **Training: Optimizes your staff's knowledge and efficiency by using your business requirements in training exercises.**

"In my 23 years in claims adjudication, I have never worked on a claim system where the plan setup is as easy, efficient and as straightforward as Plexis LCS."

*– Claims Specialist
Washington D.C.*

Configurable Rules Eliminate Manual Data Entry

Plexis LCS provides third party administrators and self-insured businesses with a complete claim processing and benefits administration package that is easy-to-use, affordable, and flexible to grow with your business.

Claim Processing

Single screen entry with hot keys to allow operators easy access to detailed member information such as claim history, benefit accumulators and notes. Flexibility in Benefit plan building allows for administration of a wide variety of plan designs including medical, dental and vision benefits.

Billing

Monthly billing reports for client fees, premiums and commissions can be produced based on a variety of rate tier structures. Automatic billing adjustments are generated based on the individual clients' billing parameters. Reconciliation of monthly billing provides for disbursement of collected fees and balance forward billing.

Electronic Data Interchange (EDI)

Electronic claims can be received from any source and easily downloaded into the system. Electronic transmissions can be viewed by the operator as a simulated claim form (HCFA1500 and UB04) to aid in claim review. All electronic claim information is stored for future retrieval and audit purposes.

Enrollment

An integrated file system for single entry and maintenance of enrollment information. Enrollment entry is compliant with MMSEA Section 111 reporting including receipt of response file.

Notes

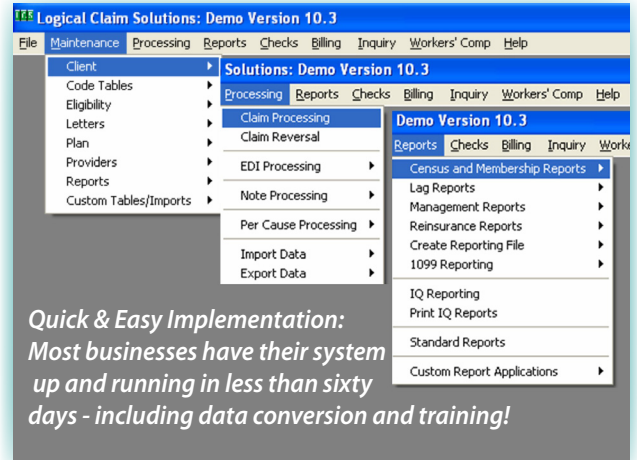

There are an unlimited number of free-form notes available for members, providers and claims. Also, members have additional note screens to record personal information, other contact information, claim referrals and pre-authorizations.

Letters

Correspondence can be generated and system data automatically inserted into a Microsoft Word document. Letters can be printed either at the time of generation or scheduled for a later date.

Security

System security can be set at the operator level. Security levels can be set to deny access to an area of the system or allow access to certain functions within an area.

Quick & Easy Implementation:
Most businesses have their system up and running in less than sixty days - including data conversion and training!

Reporting

In addition to over 50 standard paid claims analysis reports, the system also includes:

- Plan Cost Modeling
- Specific and Aggregate
- Census and Membership
- Management reporting such as: Operator Productivity, Claim Lag Report and Claim Turnaround Analysis
- 1099 reporting

Microsoft Windows Technology

Plexis LCS software is built with Microsoft Windows technology to seamlessly integrate into your current office. Its familiar Windows interface makes it easy for your staff to use the system.

Plexis Healthcare Systems is one of the fastest growing claims processing software developers in the healthcare market-place, and has provided cost-saving solutions for healthcare organizations since 1996.

A Certified Microsoft Partner, Plexis is also a selected partner in Microsoft's Connected Health and Human Services (HHS) alliance.

Plexis software and services enable healthcare organizations to increase profitability and enhance customer satisfaction while helping them meet all current governmental regulations, including HIPAA.
